PEMBERLEY

Natural History Books

A CATALOGUE OF WORLD DIPTERA

18 Bathurst Walk, Iver, Buckinghamshire, SL0 9AZ, U.K

Tel: +44 (0)1753 631114 / Fax: +44 (0)1753 631115

Email: orders@pemberleybooks.com

We are pleased to present this Catalogue of World Diptera, which includes a selection of rare and collectable titles. Many of the works have come from the library of the British dipterist, John Bowden (1924-2012), who worked for many years in Africa, before joining the Entomology Department at Rothamsted Experimental Station, Harpenden. He became an expert on the world fauna of bee-flies (Bombyliidae), and his library reflects this interest.

We hold over 700 diptera titles new works and scientific papers which can be browsed on our website or at our shop in Iver.

If you have any queries or need any additional assistance, please contact us.

Terms and Conditions

Care has been taken to carefully describe the condition of all books, any significant faults will be stated in the description. Please contact us if you require any further information.

Payment may be made by credit card VISA/MC/AMEX, or by bank transfer in £ Sterling or Euros.

All prices are nett and shown in Pounds Sterling. Postage and packing are extra. Books can be sent worldwide. Pemberley Books continues to supply customers in the EU. Please note non-UK customers are responsible for payment of any local import taxes on delivery of parcels (this will be at the lower rate for books where applicable).

Title of goods does not pass to the purchaser until the invoice is paid.

VAT No: GB646226634; EORI No: GB646226634000.

Pemberley Natural History Books – A Catalogue of World Diptera

Handbooks for the Identification of British Insects: Diptera, *Royal Entomological Society: London, 1949–1989.*

23 parts, orig. wrappers, three with paper labels to spine. Owner's name to most front wrappers. Vg

Vol. IX: Parts, 1 Introduction (1st and 2nd ed); 2 Nematocera; 3 Mycetophilidae; 4 Tabanoidea & Asiloidea; 5 Dolichopodidae; 6 Sciarid Flies; 7 Bibionid & Scatopsid Flies.

Vol X: Parts, 1 Syrphidae; 2(ai) Lonchopteridae; 2(c) Pipunculidae; 3(a) Conopidae; 4(a) Tachinidae & Calliphoridae; 4(ai) Tachinid Flies; 4(b) Muscidae; 5(a) Tephritid Flies; 5(c) Sepsidae; 5(e) Lesser Dung Flies; 5(g) Agromyzidae; 6 Scuttle Flies; 7 Keds, Flat-Flies & Bat Flies; 8 Scuttle Flies; 14 Immature Stages

A complete set of all parts published on Diptera up to 1989. Lacks only Pt 15: Lonchidae (2008) which can be supplied new at £21

[37761] Price: **£250**

ANDERSEN, S., The Siphonini (Diptera: Tachinidae) of Europe

(Fauna Ent. Scand. 33), *Brill: Leiden, 1996.*

148 pp., 6 col plates, 275 text figs, Vg

[43490] Price: **£90**

AUSTEN, E.E., Illustrations of African Blood-Sucking Flies

other than Mosquitoes and Tsetse-Flies, *BM(NH): London, 1909.*

xv, 221 pp., 13 col plates, Roy. 8vo, orig. cloth, gt, worn, spine chipped to head, endpapers replaced. Good reference copy

Colour plates by Grace Edwards

[43412] Price: **£60**

BAECHLI, G.; VILELA, C.R.; ANDERSSON ESCHER, S.; SAURA, A., The Drosophilidae (Diptera) of Fennoscandia and Denmark

(Fauna Entomologica Scandinavica 39), *Brill: Leiden, 2004.*

viii, 362 pp., 738 text figs, Vg. Trans. Soc. Brit. Ent. 16(10) (1965) loosely inserted – paper on British Drosophilidae

Detailed account of taxonomy, identification, distribution, and biology of 17 genera and 128 species of West European Drosophilidae. Full descriptions and illustrations of the terminalia for 80 North European species (Scandinavia, northern Russia, the Baltic countries, adjacent areas of Poland, Germany, the Netherlands and Great Britain). Keys for all European genera and 120 of the more common species

[43492] Price: **£95**

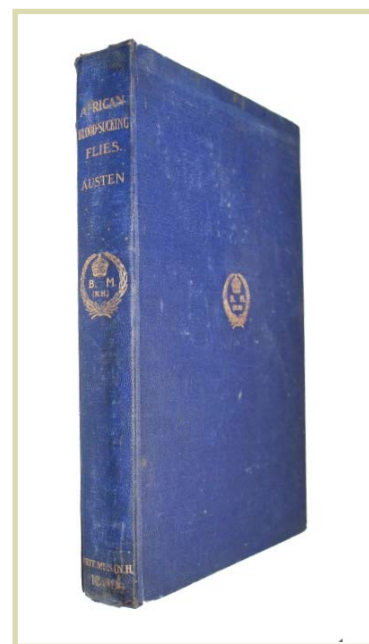

BEI-BIENKO, G.YA., Opredelitel Nasekomykh Evropeyskoy Chasti CCCR V:

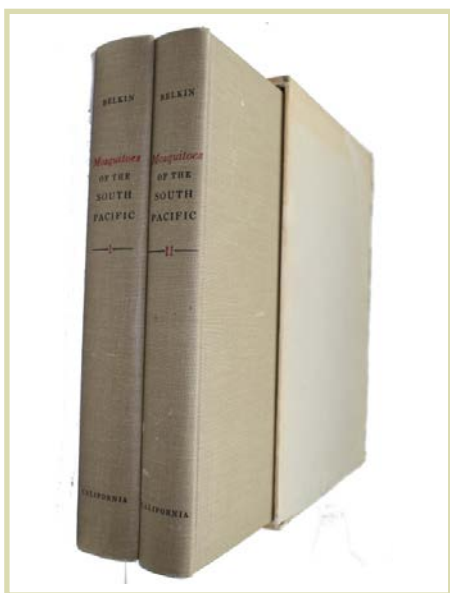

Diptera and Siphonaptera [Keys to the Insects of the European Part of the USSR], *Izdatel'stvo 'Nauka': Leningrad, 1969.*

804 pp., 505 text figs, 8vo, orig. cloth, corners bumped. From the library of British dipterist, John Bowden (1924-2012), expert on the world fauna of bee-flies (Bombyliidae), with his name to endpaper

Text Russian. Keys to the Insects of the European part of the USSR. Vol. V, Pt 1

[44484] Price: **£50**

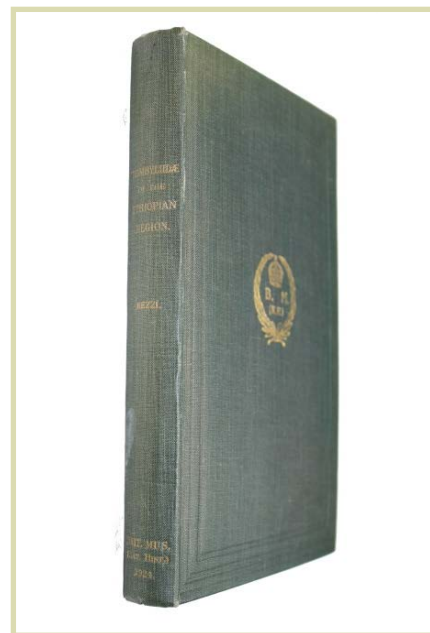

BELKIN, J.N., The Mosquitoes of the South Pacific (Diptera, Culicidae). Vol. I–II, University of California Press, 1962.

xii, 608; (iv), 412 pp., line drawings, 2 vols, 4to, orig. cloth. Owner's name to endpapers. Vg in split/stained slipcase

Illustrations by C.L. Hogue. Vol. I: Text, Vol. 2: Illustrations

[39825] Price: **£85**

BEZZI, M., The Bombyliidae of the Ethiopian Region

based on material in the British Museum (Natural History), *BM(NH): London, 1924.*

viii, 390 pp., 46 text figs, 8vo, orig. cloth. Vg. Signature of the British Dipterist, Enrico Adelelmo Brunetti (1862–1927) to endpaper

Very scarce

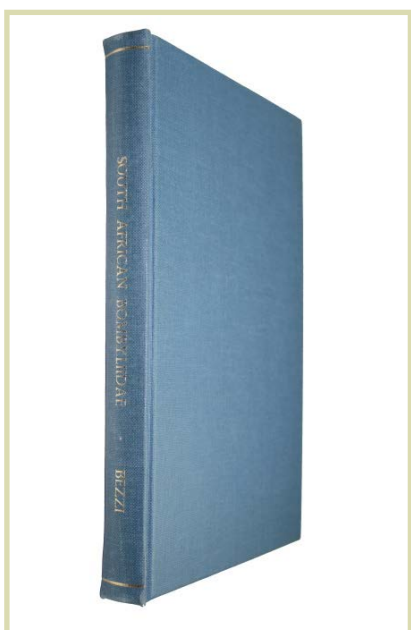

[44378] Price: **£125**

BEZZI, M., The Bombyliidae of the Ethiopian Region based on material in the British Museum (Natural History), *BM(NH): London, 1924.*

viii, 390 pp., 46 text figs, 8vo, rebound, recent buckram. Some marginal annotations in pencil and ink. Good

Very scarce

[44380] Price: **£65**

BEZZI, M., On the Bombyliid Fauna of South Africa (Diptera)

as represented in the South African Museum, *Trustees of the South African Museum, 1921.*

180 pp., 2 b/w plates, 8vo, later buckram, retaining orig. front wrapper. From the library of British dipterist, John Bowden (1924–2012), an expert on the world fauna of bee-flies (Bombyliidae), with his name to wrapper

From *Annals of the South African Museum* XVIII. Also bound at rear, 'Additions to the Bombyliid Fauna of South Africa (Diptera) as represented in the South African Museum', pp. 469–478

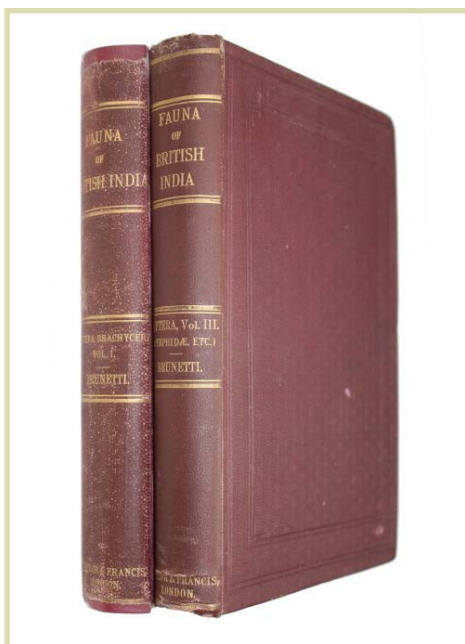

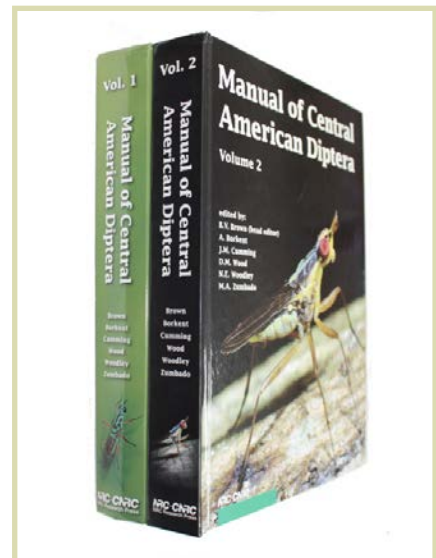

[43609] Price: **£65**

BROWN, B.V.; BORKENT, A.; CUMMING, J.M. ET AL,
Manual of Central American Diptera. Vol. 1–2, NRC, 2009–2010.

xi, 714; xvi, 715–1442 pp., 1500 line drawings, 144 col photos, 2 vols. Head of both spines bumped. Vg

Orig. hardback edition. Resource for the identification and understanding of Central American flies. Together, the two volumes treat all 106 families of flies found in the region, including biology, economic importance, classification, identification to genus level and a synopsis of each genus. Vol. 1 covers 42 of the 106 families of flies, the Lower Diptera, and includes introductory chapters and keys to all the Central American families for both adult and larval stage

[38780] Price: **£160**

BRUNETTI, E., Fauna of British India: Diptera Brachycera Vol. I [and] Diptera Vol. III: Pipunculidae, Syrphidae, Conopidae, Oestridae, Taylor & Francis, 1920–1923.

x, 401; x, 424 pp., 10 b/w plates, 125 text figs, 2 vols, 8vo, orig. cloth. Vol. I rebaked and recased with new endpapers, preserving the original backstrip. A good set. Provenance: From the library of British dipterist, John Bowden (1924–2012), an expert on the world fauna of bee-flies (Bombyliidae), with his signature to endpapers, and with his pencil annotations to text

Rare original editions. The Brachycera – Brunetti's work was split between these two volumes

[44383] Price: **£125**

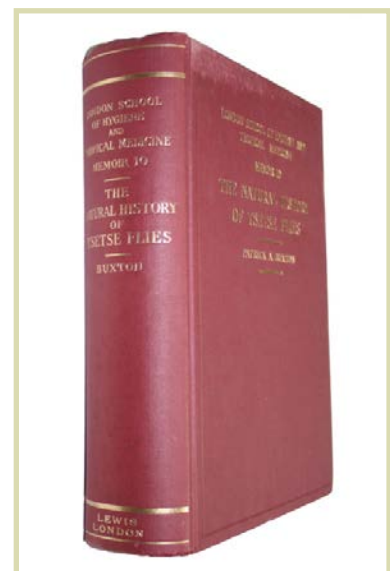

BUXTON, P.A., The Natural History of Tsetse Flies:

An Account of the Biology of the Genus *Glossina* (Diptera),
H.K. Lewis: London, 1955.

xviii, 816 pp., 47 b/w plates, 165 text figs, Roy. 8vo, orig. cloth. Foxing to endpapers; edges lightly spotted. Vg. Inscribed by the author to the entomologist Samuel Gordon Smith (1885–1965). Loosely inserted is a reprint of *The Use of the New Insecticide DDT in Relation to the Problems of Tropical Medicine* (Buxton, P.A., 1945, Transactions of the Royal Society of Tropical Medicine and Hygiene Vol. 38(5))

London School of Hygiene and Tropical Medicine, Memoir No. 10. A classic study of the Tsetse fly

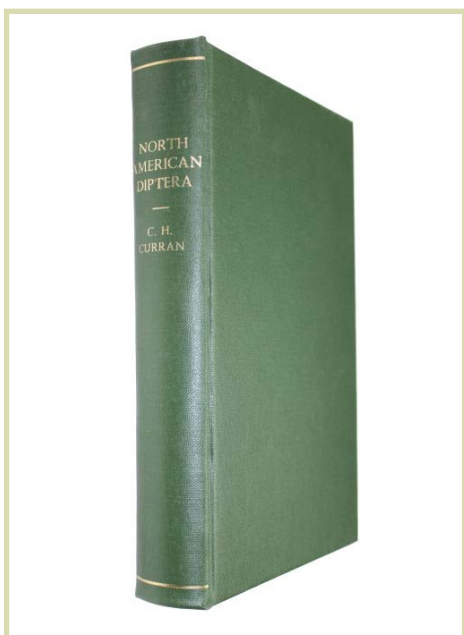

[42688] Price: **£90**

CROSSKEY, R.W., The Natural History of Blackflies, Wiley: Chichester, 1990.

ix, 711 pp., text figs, Vg in d/w. From the library of Prof. J. Green (1928–2016) with his signature to endpaper

[38575] Price: **£225**

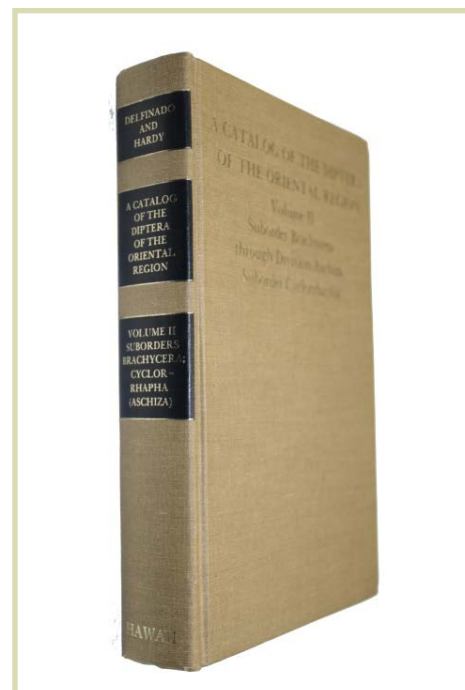

CURRAN, C.H., The Families and Genera of North American Diptera, C.H. Curran: New York, 1934.

512 pp., portrait frontis, 1 col plate, numerous line drawings, 8vo, well bound, later green buckram. Some pencil markings and ink annotations to text. Errata slip loosely inserted

First edition

[44392] Price: £50

DELFINADO, M.D.; HARDY, D.E., A Catalog of Diptera of the Oriental Region Vol. II:

Suborder Brachycera through Division Aschiza, Suborder Cyclorhapha, *University Press of Hawaii: Honolulu, 1975.*

x, 459 pp., endpaper maps, 8vo, orig. cloth. Vg

DOCZKAL, D.; SCHMID, U. (EDS), Volucella – Die Schwebfliegen-Zeitschrift. Bd 2–6,

Staatliches Museum für Naturkunde: Stuttgart, 1998–2002.

132; 192; 189; 168; 261 pp., line drawings, 5 parts, orig. wrappers. Vg

Offered here are Bd 2–6 only (of 8). The journal was published between 1995–2007 complete in 8 volumes, and published papers (in English or German) on the Syrphidae of the Palearctic Region. ISSN 09479538

[43750] Price: £75

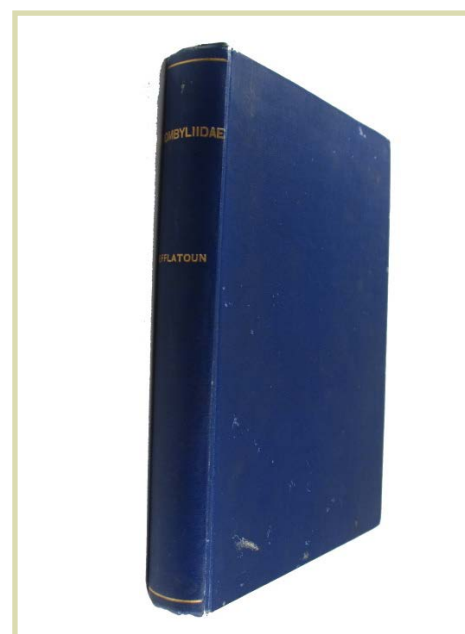

EFFLATOUN, H.C., A Monograph of Egyptian Diptera Pt VI: Family Bombyliidae. Section I: Subfamily Bombyliidae

Homoeophthalmae, *Imprimerie Paul Barbey: Cairo, 1945.*

xxxix, 483 pp., 38 plates (552 line drawings), 8vo, cont. cloth, marked/stained, particularly to margins of rear board. Good

Text English. Bulletin de la Societe Fouad 1er d'Entomologie 29

[43846] Price: £95

EVENHUIS, N.L., An Indexed Bibliography of Bombyliidae (Insecta, Diptera), J. Cramer: Braunschweig, 1983.

493 pp., 16 b/w photos, Stain to rear board. Vg. From the library of British dipterist, John Bowden (1924–2012), an expert on the world fauna of bee-flies (Bombyliidae), with 5 related short papers by him loosely inserted

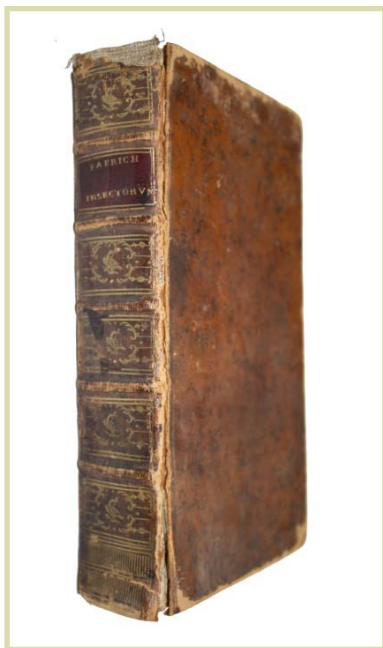

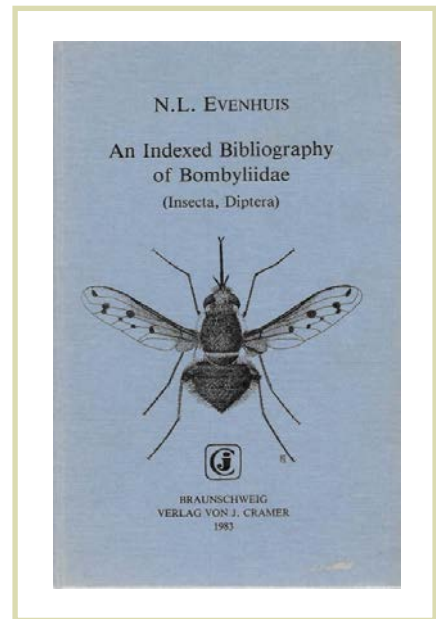

[43604] Price: £65

EVENHUIS, N.L., Systematics and Evolution of the Genera in the Subfamilies Usiinae and Phthiriinae (Diptera: Bombyliidae) of the World, Brill, 1989.

72 pp., 54 text figs, Spine faded. Vg

Bishop Museum Bulletin in Entomology 3 / Entomonograph Vol 11

[43605] Price: £25

FABRICIUS, J.C., Mantissa Insectorum sistens eorum species nuper detectas adiectis characteribus genericis, differentiis specificis, emendationibus, observationibus. Tom. I-II, C.G. Proft: Hafniae, 1787.

xx, 348; [2], 382 pp., 2 vols, 8vo (207x124mm), cont. full calf, worn, some loss to head of spine, torn to foot, joints cracked but firm; raised bands to spine, gilt tooling to compartments, red leather titlepiece, marbled endpapers, all edges tinted red. Some browning/spotting, occasional stains, including small stain to outer margin of first few leaves. The last two preliminary leaves to Tom. I are misbound, pp xvii/xviii follow page 340, and pp. xix/xx, p. 344. A sound copy of a scarce work

First edition. Scarce. Contains descriptions of numerous new species from around the world. Johann Christian Fabricius (1745–1808) was a Danish entomologist and a student of Linnaeus. He is considered one of the most important entomologists of the 18th century, he described many new species and established the basis for modern insect classification.

Horn-Schenkling 6203 ('selten')

[44504] Price: £650

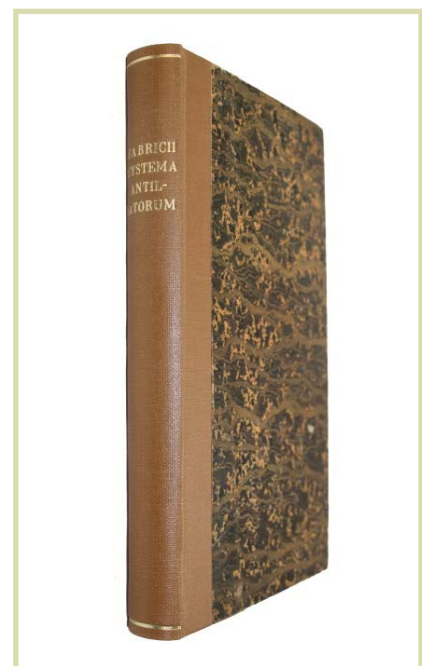

FABRICIUS, J.C., Systema Antliatorum secundum ordines, genera, species, adiectis synonymis, locis, observationibus, descriptionibus, Apud Carolum Reichard: Brunsvigae, 1805.

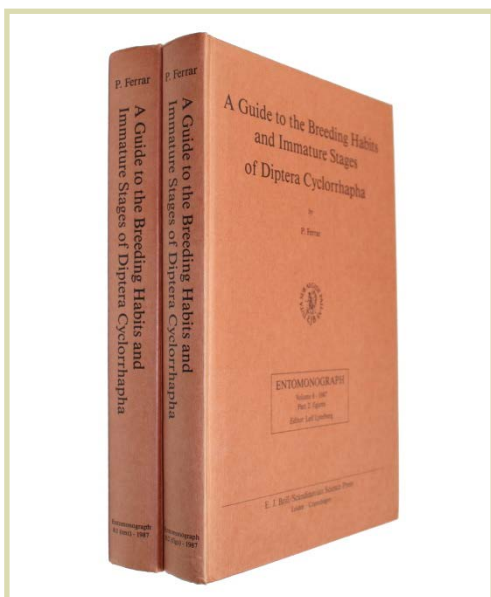

xiv, 16–372, [4], 30 pp., 8vo (210x130mm), rebound in later (20th century) qtr buckram, marbled boards, marbled edges. Some foxing. Vg

First edition. This volume is devoted to Diptera. Johann Christian Fabricius (1745–1808) was a Danish entomologist and a student of Linnaeus. He is considered one of the most important entomologists of the 18th century, he described many new species and established the basis for modern insect classification.

Horn-Schenkling 6223; Evenhuis (1997) *Litteratura Taxonomica Dipterorum*. Vol. I, p. 250

[44499] Price: £360

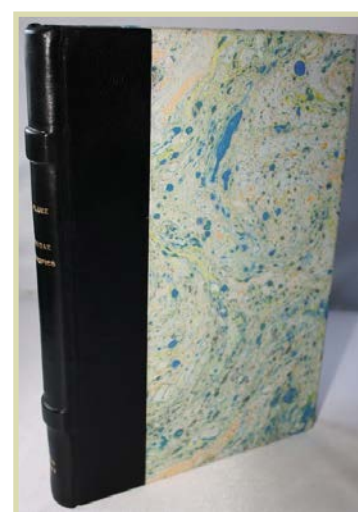

FERRAR, P., A Guide to the Breeding Habits and Immature Stages of Diptera Cyclorrhapha (Pt 1–2), Brill: Leiden, 1987.

2 vols: 907 pp., line drawings, 2 vols. 'Review copy' ink stamp to title-pages. A very good set from the library of K.G.V. Smith (1929–2017), leading British dipterist at the Natural History Museum, London, and editor of the Entomologist's Monthly Magazine, with his name to endpapers. Loosely inserted are a copy of Smith's review of the book, published in EMM, and a 2-page typed letter from the author thanking him for the positive review

Original edition. A systematic study of the immature stages of the Diptera Cyclorrhapha, with information on Scope & Distribution, Economic Importance, Literature, Biology, Immature Stages for each family. Pt 2 contains 418 pages of detailed line drawings

[40150] Price: **£350**

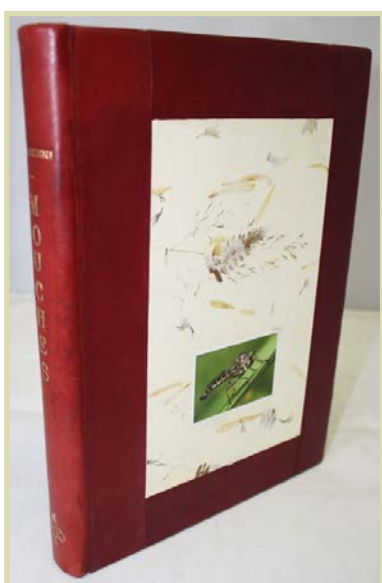

FLUKE, C.L., Catalogue of the Family Syrphidae in the Neotropical Region, São Paulo, 1956–1957.

76, 181 pp., Recent, fine, half leather, raised bands to spine, marbled boards + endpapers. Fine craft binding by 'M.M.' (Monique Macaux). Short tear to inner margin of first page neatly repaired. Fine copy

Offprint from Revista Brasileira de Entomologia Vol. 6 (1956): 193–268; Vol. 7 (1957): 1–181

[27016] Price: **£95**

HAENNI, J.-P., Mouches: Histoire naturelle des insectes diptères, et leurs relations avec l'homme, Museum d'histoire naturelle: Neuchatel, 2004.

168 pp., 200+ illustrations (150 col), Rebound in maroon leather, decorative marbled paper panels with botanical inclusions inset into both covers, hand made marbled endpapers. Fine craft binding

Text French. Catalogue published to accompany an exhibition, 'Mouches' at the Museum d'histoire naturelle de Neuchatel, 2004–2005. Introduction to the fascinating and diverse world of Diptera (flies and midges). The importance of this group of insects in global biodiversity and in natural cycles, as well as in human health and culture, is enormous but generally underestimated. Written for non-specialists, but of interest to scientists and entomologists

[26971] Price: **£75**

HALL, J.C.; EVENHUIS, N.L., Flies of the Nearctic Region Vol. V, Pt 13, No 1–5: Bombyliidae, Schweizerbart'sche: Stuttgart, 1980–1986.

592 pp., 448 text figs, 5 parts, orig. wrappers. Vg

First 5 of 7 published parts on Bombyliidae of the Nearctic Region

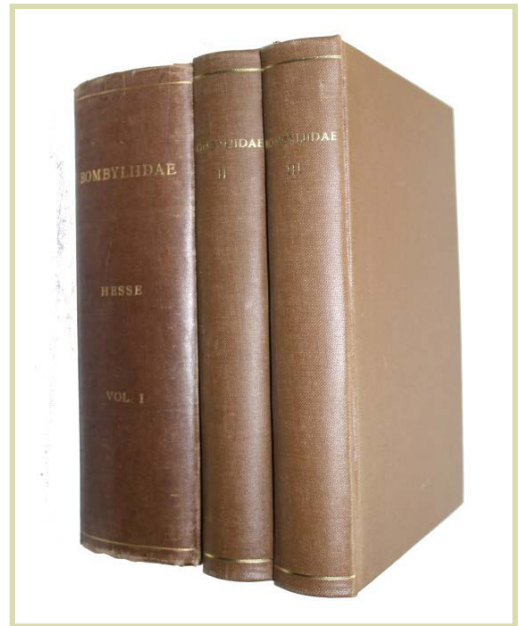

[43602] Price: **£150**

HESSE, A.J., A Revision of the Bombyliidae (Diptera) of Southern Africa. Pt I–III, *South African Museum*, 1938[–1956].

1053; 1–464; 465–972 pp., 3 b/w plates, 618 text figs, 3 vols, roy. 8vo, buckram. Occasional marginal pencil annotations. From the library of British dipterist, John Bowden (1924–2012), an expert on the world fauna of bee-flies (Bombyliidae), with his name to endpaper

From *Annals of the South African Museum* XXXIV, XXXV (Pt 1+2). Rare. Albert John Hesse (1895–1987) was a South African entomologist. He was a curator at the South African Museum for fifty one years. Hesse worked primarily on Bombyliidae and Mydidae. The current work comprises his monumental revision of the Bombyliidae southern Africa

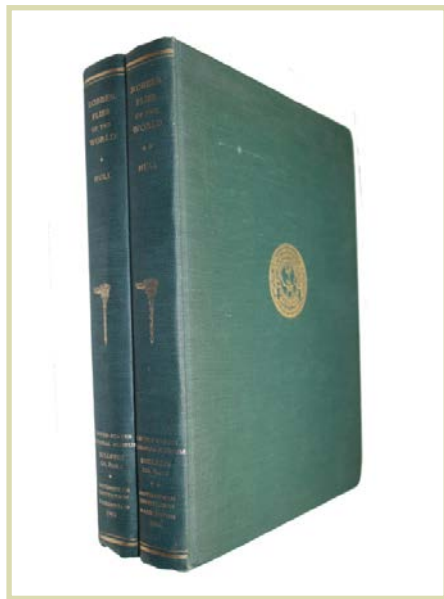

[44467] Price: **£375**

Rare important work on Diptera – especially so with some plates hand-coloured

MACQUART, J., Diptères Exotiques nouveaux ou peu connus. Tome 1 (Pt 1–2), Tome 2 (Pt 1–3), 1–5 Supplément, Librairie Encyclopedique de Roret: Paris, 1838–1855.

221, 207; 135, 140; 304; 238, 96, 77; 364, (132) pp., 187 plates (82 hand-coloured), 9 folding tables, Complete in 2 volumes (5 parts) and 5 supplements, bound in 5, 8vo (210x135mm), cont. half calf, marbled boards and endpapers, Tome 1–2 (3 vols): scuffed and worn, chipped with some small areas of loss to spines, rear joint to Tome 1 cracked along almost entire length, others with smaller areas of wear along joints; Supplements (2 vols): possibly bound slightly later in very closely matching style, very good. Some foxing. A few plates and pages browned. Some plates closely cropped affecting the plate numbers

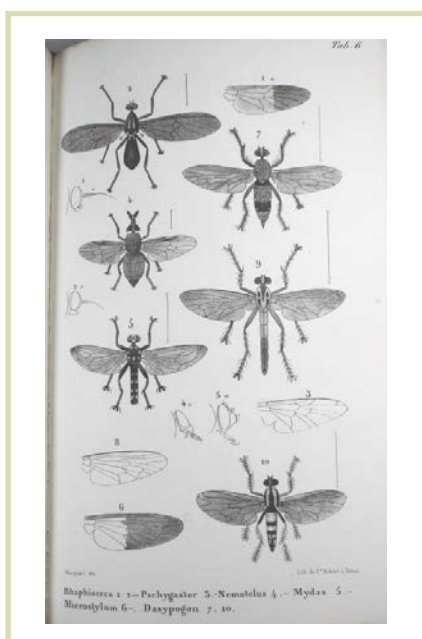

Text French. Very scarce. Lithographic plates by the author, unusually, those to Tome 1 and Tome 2 (Pt 1+2) are hand-coloured (apart from one illustrating wings only). (Plates numbered 1–25; 1–14; 1–21, 3bis; 1–22; 1–36; 1–20; 1–6; 1–7; 1–28; 1–7. All bibliographies omit to mention the bis plate in Tome 2, part 1). Originally published in the *Mémoires de la Société royale des sciences, de l'agriculture et des arts de Lille*, 1838–55, and also issued in separate form (as here, with the exception of final part of the supplement, which is paginated as in the original journal issue: 25–156). Evenhuis gives pagination for the separate issue of Supplément 2 as 104, however our copy runs only

to p. 96 and is lacking the 8pp of 'Explication des Figures' and 'Table Alphabétique des Matières' for this part. This copy includes the 'Tableau général des espèces' pp. 337–364 following Supplément 4 (not listed in Evenhuis' collation). The separate issue of Tome 1, part 1 was originally issued under the title 'Insectes dipteres nouveaux ou peu connus', however, as noted by Evenhuis, most copies have a strip of paper with the altered title, 'Dipteres exotiques' pasted over the original to half title and title, as in this copy.

Pierre Justin Marie Macquart (1776–1855) was one of the eminent French dipterists of the nineteenth century and a friend of Meigen. He produced a number of works on European as well as non-European Diptera in which he described many new species. He was director of the Lille Musée d'Histoire Naturelle. Macquart describes almost 2000 new non-European species in this work, drawing on material in a number of important collections of Diptera then in Paris.

[43787] Price: **£1,850**

MACQUART, J., Histoire Naturelle des Insectes: Diptères. Tome I–II, Librairie Encyclopedique de Roret: Paris, 1834–1835.

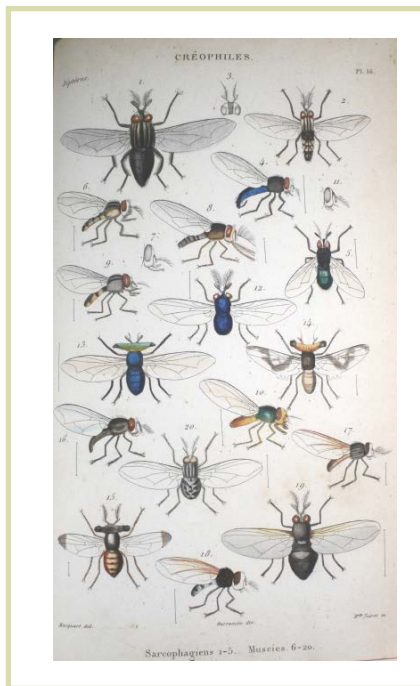

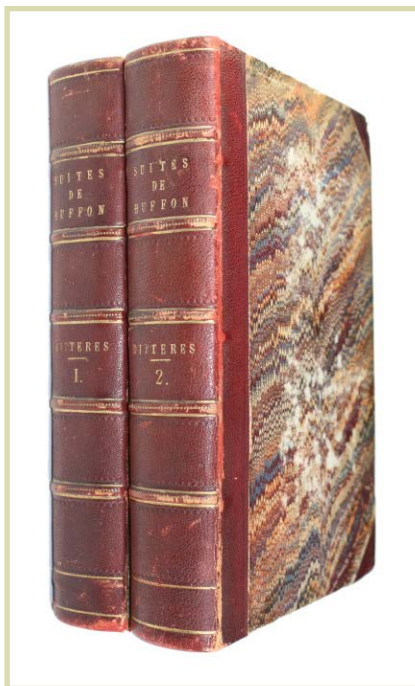

[ii], 578, [2], 8; [iii], 703, [1], 8 pp., 24 hand-col plates, 2 vols, 8vo, cont. half leather, scuffed and worn, joints to Tome I cracked and a little tender, marbled boards (rubbed), edges and endpapers. Good set

Forms part of the 'Suites à Buffon'. Engraved plates by the author. Rare, particularly so with plates hand-coloured.

Pierre Justin Marie Macquart (1776–1855) was a French dipterist. He produced a number of works on European as well as non-European Diptera in which he described many new species. Latreille enlisted him as author of these two volumes in the 'Suites a Buffon' series.

MCALPINE, J.; PETERSON, B.V.; SHEWELL, G.E.; TESKEY, H.J.; VOCKEROTH, J.R.; WOOD, D.M. (EDS), Manual of Nearctic Diptera. Vol. 1 + 2, Agriculture Canada: Quebec, 1981–1987.

1332 pp., numerous text figs, 2 vols. A very good set

Vol. 1 contains introductory chapters, keys to families for adults and larvae, and detailed treatment of the 24 families of Nematocera and 19 families of orthorrhaphous Brachycera; Vol. 2 covers the 65 families of the Muscomorpha (Cyclorrhapha). Keys to genera are provided for all families. A third volume on 'Evolution & Classification' was published in 1989, but is not present here.

MEADE, R.H., Descriptive List of the British Anthomyidae.
Pt 1–2, London, 1897.

79 pp., 8vo, cont. half leather, marbled boards, spine and corners rubbed/scuffed. Interleaved copy. Some browning to blank leaves at front and rear. From the library of the dipterist, Adrian Pont with his name to endpaper. Also with book-plate of Linley Blathwayt (1839–1919). Blathwayt served in the British Indian army for many years. On retirement in 1880 he settled at Eagle House, Batheaston and took up scientific and natural history interests. He was the president of the British Microscopical Society and a Fellow of the Entomological Society. He supported women's suffrage and Eagle house became a refuge for suffragettes

This list is supplementary to one published in the *Entomologist's Monthly Magazine* (1881–1883). Scarce

[41125] Price: £40

MEIGEN, JOHANN WILHELM, Systematische Beschreibung der bekannten Europäischen zweiflügeligen Insekten. Erster[–Siebenter] Theil, Friedrich Wilhelm Forstmann/Schulz-Wundermann/Schulz: Aachen/Hamm, 1818–1838.

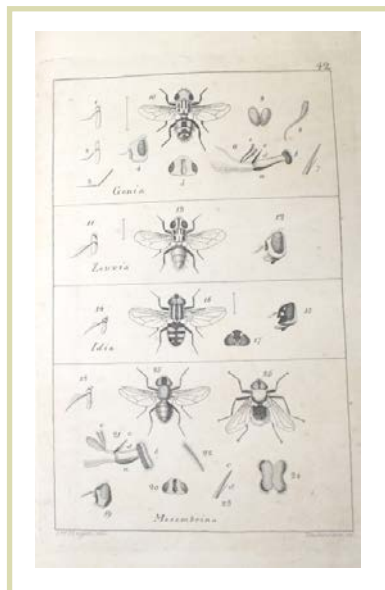

xxxvi, 324, [1]; xxxvi, 363; x, 416, [1]; xii, 428; xii, 412; xi, 401, [3]; xii, 434, [2] pp., 74 plates (10 hand-col), 7 vols, 8vo, uniformly bound in later cloth, leather title-pieces, teg. Occasional browning and foxing. Last 2 leaves of Vol. VII torn and neatly repaired

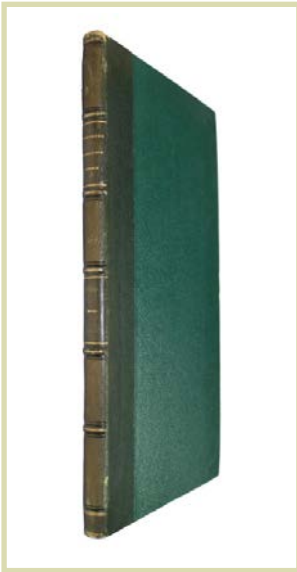

First editons. Plates mounted allowing them to foldout. This work may be found with plates coloured or uncoloured. In this set most of the plates are uncoloured, but the 10 plates in Vol. II are partly hand-coloured. Vol. I lacks the index (pp. 325–332) and has a 6-page early typescript index bound in its place. This work published in seven volumes laid the foundation for all further systematic work on Diptera.

Engraved and lithographic plates by the author. Rare. Johann Wilhelm Meigen (1764–1845) was a German entomologist, botanist and illustrator; preeminent dipterist and known as the father of European dipterology.

THEOBALD, F.V., [Culicidae Papers – compiled by F.V. Theobald], 1891–1910.

35 vols, cloth, some worn, some with torn/damaged spines

A unique collection of 35 bound volumes (numbered and with spine titles) of approximately 150 papers, mostly on the Culicidae, compiled by the well-known entomologist, Frederick Vincent Theobald (1868–1930). A few volumes bear the stamp, Wye Court, Wye, and a later blind stamp of the Liverpool School of Tropical Medicine, a few with his signature. This collection represents a working archive, used by Theobald to assist his research on mosquitoes. The collection is global in content, covering the period 1891–1910. Many papers by leading international dipterists of the day are inscribed to Theobald. The collection also includes 12 papers by Theobald.

1. F.W. Theobald, A catalogue of the Culicidae in the Hungarian National Museum, 1905.
2. E. Autran, Los Mosquitos Argentionos, 1907.
3. C.S. Ludlow, Culicidae of Philippine Islands.
4. Thompson, M.T. Alimentary Canal of the Mosquito.
5. New Culicidae – Ludlow.
6. F.W. Theobald, The Mosquitoes or Culicidae of Jamaica, 1905.
7. Mosquitos do Brasil.C. Bourroul and A. Lutz.
8. Les Moustiques. E. Sergent, La Lutte contre Les Moustiques. 1903.
9. Mosquitoes & Malaria. F.Pearse, Mosquitos and Malaria. 1902.
10. Larvae Culicidae – Dyar & Knab.
H.G. Dyer; F. Knab. The Larvae of Culicidae classified as independent organisms, 1906.
11. Culicidae of India. Theobald, Green & Adie.
Includes, F.V. Theobald. Some new mosquitoes from Ceylon. 1904.
12. Culicidae of Hungary, Kertész Kálmán.
Kalman, K. A magyarországi szúnyogfélék rendszertani ismertetése.1904.
13. Culicidae S. America. Fajardo. Coeldi. Lutz.
14. Larvae of Culicidae. Dyar & Knab]

15. F.L. Arribalzaga. *Dipterologia Argentina*, 1891.
16. Culicidae 6. Includes:
 - F.V Theobald. Five new Culicidae from Ashanti. 1910.
 - F.V. Theobald. Notes on some Transvaal Mosquitoes. 1908.
 - F.V. Theobald. The Culicidae of Fiji, including two new species. 1910.
 - F.V. Theobald. A new African Corethra. 1911.
17. German Papers Culicidae. Includes papers by A. Eysell, R. Ross, H. Ziemann etc.
18. Culicidae and Diseases. Includes papers by J.R. Adie, G.M. Giles, R. Ross, L.W. Sambon.
19. Papers on Culicidae. Includes:
 - Loius W. Sambon, The life-history of 'Anopheles maculipennis', 1901.
 - F.V.Theobald, The Classification of the Anophelina, 1902.
 - F.V. Theobald, A new culicid genus from Uganda, 1904.
 - Also papers by Adolpho Lutz.
20. Mosquitoes & Malaria. A selection of international papers including: Report of the Proceedings of the Expedition for the study of the Causes of Malaria dispatched to Sierra Leone, West Africa, under the Leadership of Major Ronald Ross, 1899.
21. Studies in Relation to Malaria, by G.H.F. Nuttall; A. Shipley, 1901.
22. Mosquitoes & Malaria. Includes the important paper 'Report on two experiments on the Mosquito-Malaria theory by Louis W. Sambon and George C. Low, illustrated by A. Terzi. Also papers by Ronald Ross and Charles Finlay.
23. Culicidae of Europe. *Revisone Sistematica Della Famiglia Delle Culicidae Europee*, by Eugenio Ficalbi, 1896.
24. Culicidae, N. & S. America, India. Includes a rare pamphlet by George Michael James Giles (1853–1916), Notes on Collecting and Preserving Mosquitoes [1900], printed in India 'at the "Hamidia" Press, Shahjahanpur. Author's inscription reads 'Probably the only Nat History pamphlet ever printed in an upcountry Indian Press. With the Author's Complements. Observe the Illustrations copied by a native lithographer. Of course I don't except your forthcoming monograph to live up to the sumptuous style of this.' (A humorous reference to Theobald's Monograph of the Culicidae). Also a reprint of F.V. Theobald, The Classification of Mosquitoes, 1901.
25. Culicidae of Italy. Contains two major papers by Eugenio Ficalbi; *Venti specie di Zanzare (Culicidae) Italiane*, 1899 and *Notizie Preventive sulle Zanzare Italiane 1889–1896*.
26. Culicidae. Italy. Includes papers by Bruno Galli, Valerio and B. Grassi.
27. F. Fajardo. 1904. *O Impaludismo Ensaio de la Estudo Clinico*, 1904.
28. Mosquitos of New York State- Felt. E.P. Felt, *Mosquitos or Culicidae of New York State*, 1904.
29. Italy & Eritrea. Includes papers by Mario Bezzi. Also Carl August Lundström, *Beitrag zur Kenntnis der Dipteren Finlands, I–III*, 1906–1907.
30. Culicidae France & French Colonia.
31. Culicidae 5
32. Culcidae 4
33. Culicidae 1. Includes F.V Theobald, Report on the Collection of Mosquitoes (Culicidae) received at the British Museum (Natural History), from various parts of the world in connection with the investigation into the causes of Malaria, 1900.
34. Culicidae or Mosquitoes of North America. Includes papers by H.G. Dyar, F.Knab, G.W. Herrick, L.O. Howard etc.
35. Culicidae-Government Reports. A series of British Empire reports. Includes F.V. Theobald, Descriptions of the new mosquitoes collected by Dr. Graham in Ashanti, 1909.

In 1894 Theobald was appointed as lecturer at the South Eastern Agricultural College in Wye, later becoming Professor of Economic Entomology. He later became responsible for Economic Zoology at the British Museum (Natural History). In recognition of the growing understanding of the medical importance of mosquitoes, the Museum trustees invited Theobald to publish a major work on the Culicidae. Benefitting from the administrative infrastructure of the British Empire, Medical Officers throughout the colonies were instructed to collect specimens for the project and to send them to the Museum in London. The resulting monumental publication, *A monograph of the Culicidae, or mosquitoes: mainly compiled from the collections received at the British museum from various parts of the world in connection with the investigation into the cause of malaria conducted by the Colonial office and the Royal Society*, was published, 1901–1910

[44473] Price: **£1,600**

THEOBALD, F.V., A Monograph of the Culicidae or Mosquitoes. Vol. I–V + Plates,
BM(NH): London, 1901–1910.

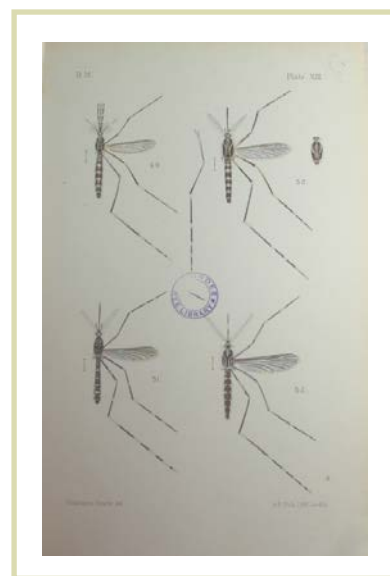

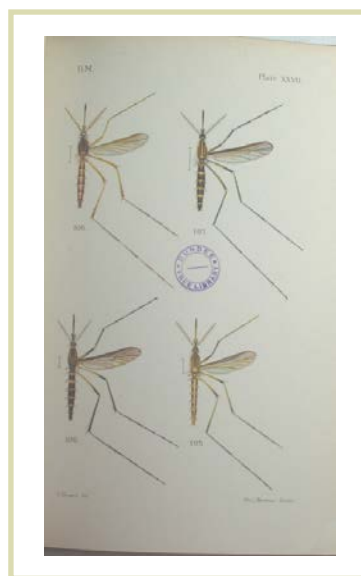

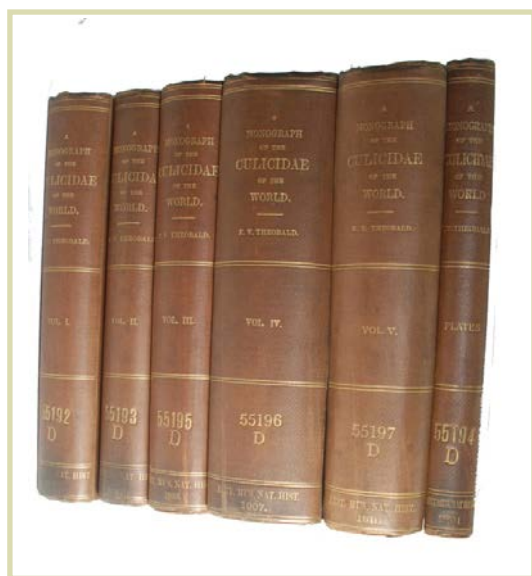

424; 391; 359; 639; 646; viii pp., 37 col + 44 b/w plates, 1220 text figs, folding chart, 6 vols, 8vo, orig. cloth, corners bumped, binding broken in plate volume with pages/plates loose in binding. Some foxing. Ex-lib.: Free Library of Dundee, gilt shelf numbers to spines; small ink stamps to title-pages + plates (centre of colour plates but not obscuring images)

Scarce complete set including the atlas of 37 col and 5 b/w plates (1901).

This monograph represents one of the great scientific investigations of the early 20th century, based on the contributions of many hundreds of individuals from around the world. E.R. Lankester, Director of the British Museum (Natural History) explains the origins of this important publication in the preface, stating that at the request of the Right Hon. Joseph Chamberlain, the Royal Society established a 'Committee to co-operate with the officials of the Colonial Office in the investigation of the causes of malaria and the possibility of controlling that scourge of tropical lands'. Three departments of the British state, the Colonial Office, the Foreign Office, and the India Office were mobilised 'in the attempt to procure properly preserved collections of mosquitoes from all parts of the world'. A printed circular was 'despatched to every officer of the colonial service. Other organisations and institutions, as well as private individuals and collectors throughout the world, were asked to assist in the undertaking', resulting in vast numbers of specimens being sent from the British Empire and beyond, to the British Museum (Natural History). Theobald was employed to produce a monograph based on these collections, who was 'unremitting in his labours'.

Most of the plates were drawn by Constance Beard, Theobald noted 'So carefully and beautifully have they been executed that scarcely any have had to be returned for alterations'
